CERTIFICATES

- Certiport - Artificial Intelligence (Global Certification)
- IBM - Machine Learning with Python
- Ethnotech - Data Analytics using Excel (Global Certification) HTML5, AI, SQL
- Udemy - Full Stack Web Development Bootcamp
- Devtown-Artificial Intelligence and Machine Learning
- AICETE - Patent Course

EDUCATION

2022 - 2026 (Ongoing)

SRINIVAS INSTITUTE OF TECHNOLOGY

- BE-ARTIFICIAL INTELOGENCE AND MACHINE LEARNING
- CGPA: 8.1(till 6 sem)

2020 - 2022

EXCEL PRE-UNIVERSITY

- 79.16%

SKILLS

- Programming Languages: Python, Java, HTML, CSS, JavaScript, Dart & C (basics)
- Web Development
- Flutter Development
- Machine Learning
- Leadership
- Effective Communication
- Critical Thinking
- Problem Solving

PROFILE

An enthusiastic and detail-oriented Artificial Intelligence and Machine Learning (AIML) student with hands-on experience in machine learning projects, full-stack web development and flutter mobile app development. Skilled in designing and deploying data-driven solutions, with a strong understanding of algorithms, data analysis, and model optimization. Passionate about leveraging technology to solve real-world problems and contribute to impactful innovations. Eager to learn and grow in the fields of AI, machine learning, and web technologies.

PROJECTS

- **Note App** Aug-Oct 2025
 - Built a responsive notes web application with HTML, CSS, and JavaScript, enabling users to efficiently create and delete notes.
- **To - Do List Application** Aug 2023
 - Developed a responsive To-Do List application with features like task addition, deletion, editing and saving.
 - Technologies: JavaScript, HTML, CSS
- **Weather App** May-June 2025
 - Developed a Flutter weather app using OpenWeather API with real-time data, showing temperature, conditions, hourly forecast, and humidity, wind speed, and pressure.
 - Technologies: Flutter, Dart, OpenWeather API
- **Satellite Imagery-Based Land Classification** 2023 - 2024
 - Led a team to build a land classification model using EuroSAT satellite imagery and implemented ResNet50 on Google Colab to classify forests, water bodies, urban areas and many other types.
 - Technologies: Python, ResNet50, Deep Learning, Google Colab
- **Heart Disease Prediction System** Aug 2025
 - Built a Streamlit web app using a Random Forest model to predict heart disease risk in real time.
 - Technologies: Python, Scikit-learn, Streamlit, Joblib, Pandas
- **SoulSync - The Intelligent Dairy Companion** Dec 2025
 - AI-powered intelligent diary companion that converts user conversations into structured journal entries and provides emotion-aware reflections.

LANGUAGES

- English, Kannada, Hindi, Malayalam
